

## **FIRST 7-8 DAYS TOPICS AND ITS DISCUSSION UNDER MICROSCOPE**

1. Endodontic access (detail endodontic anatomy and its importance, all teeth need to understand with their anatomy variation)
2. Apical patency, crown down and its importance
3. Different working length techniques.
4. Different irrigation solution and technique.
5. Intra canal medicaments and its importance.
6. Bio mechanical preparation.
7. Obturation and different technique.
8. Post Obturation and its importance.
9. Crown Preparation.

**\*Students need to get their Airotor, Typho jaw and extracted teeth for preclinical work.**

## **DISCUSSION TOPICS**

**(EVERYDAY MORNING DISCUSSION TOPIC, Time 9.00 to 10.00AM)**

1. Single visit endodontic.
2. Error during Endodontics Access opening, BMP, obturation.
3. Endo Emergency.
4. Apexification and Apexogenesis.
5. IPC, DPC, MTA
6. LA and complication.
7. Medical Emergency.
8. Medicine.
9. Endodontic flare ups.
10. Shade selection.
11. Elastomeric impression technique
12. Endo-perio lesion.
13. Bonding
14. Post-core and different post system.
15. Bonding
16. Trauma
17. Rubber Dam
18. Endo RCT and crown
19. Basic about Extraction and different forceps.
20. Non odontogenic pain.
